Session-1 Installation

Thursday, July 7, 2022   3:45 PM

Download and install Java Development Kit (JDK)

➢ Download Link - Java Downloads | Oracle
➢ Install JDK using JDK executable   (jdk-17_windows-x64_bin.exe)
➢ Java is installed in location - C:\Program Files\Java\jdk-17.0.1
➢ Configure Java path
  1.   Copy **Java path** - C:\Program Files\Java\jdk-17.0.1\bin
  2.   Right click on ThisPC->Click on Properties->Advance System Setting->Enviro
         Variables->System Variable
  3.   Select path variable -> Edit->New Button
  4.   Paste copied **Java path**
  5.   Click on OK button to close the window
  Java is ready in the system
➢ Verify if Java is properly installed in the system
  Open command prompt and type command "**java --version**"
                                        1:24 / 16:45

```
FirstJavaClass.java ×   DemoClass.java                                    Outline ×
 1
 2  public class FirstJavaClass {                               FirstJavaClass
 3                                                                  main(String[]
 4      //variable
 5      //methods
 6
 7      //main function- mandatory function . it entry point of the program
 8
 9      public static void main(String arg[])
10      {
11          //code
12          System.out.println("Hello Java");
13          System.out.println("Welcome Java");
14
15      }
16 }
17
```
